3toGo

FOR SPANISH TEACHERS

Practice that shows up before the feed does.

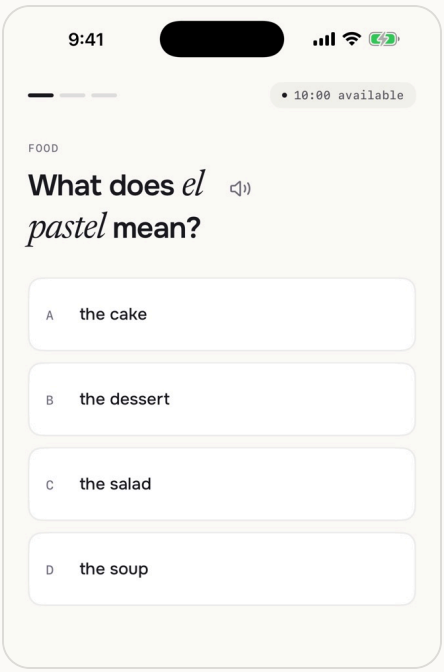

3toGo is an iPhone app that asks 3 quick Spanish questions before Instagram or TikTok opens. Your students practice in the minutes they'd otherwise scroll.

01

They pick the apps that pull them in

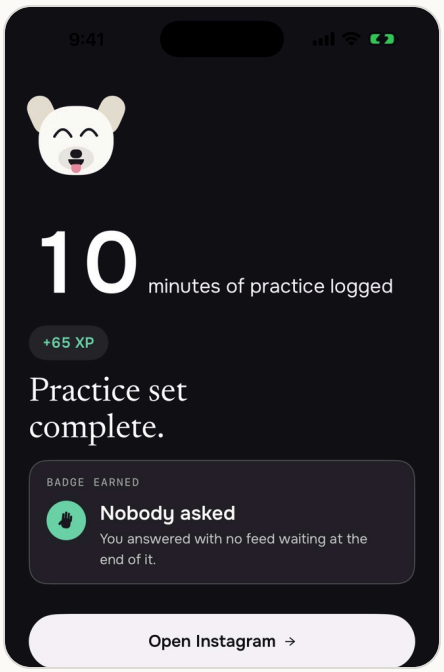

3toGo blocks them with Apple's Screen Time.

02

Opening one brings 3 quick questions

Vocabulary and verbs, matched to their level.

03

Answer them and they're in

Their apps open for the break they chose.

WHAT STUDENTS GET

Real Spanish, a few questions at a time

- 900+ beginner questions: travel, social life, work, dating, daily life and food
- 28 everyday verbs in the present, past and future
- Missed words come back until they stick
- Questions get harder as they improve

WHAT YOU DO

Nothing to manage

No accounts, no class lists, no dashboard. Students' answers and progress stay on their iPhone.

- **For you:** a free year. It ends on its own and doesn't renew, so there's nothing to cancel.
- **For your students, if you want:** a class code for 50% off their first year, then the regular price. You earn 60% of what we receive, on renewals too.
